World Class Design & Fabrication Solutions

World Class Engineering Design and Fabrication

Tinsley Bridge Services offers a complete, integrated range of fabrication solutions covering the entire planning and manufacturing process from concept to finished commissioning.

Experienced fabricators and site installation engineers, with an unrivalled depth of expert knowledge in key industrial sectors are involved at every stage. They bring the same professional approach to every project whatever the size. With the company involved at every stage, projects are delivered on time, on budget and quality assured.

Massive, well resourced workshops support the manufacture and trial-build of heavy fabricated equipment and operational testing prior to dispatch. Our qualified engineers can project manage small, large or complex developments from a few hundred pounds to multimillion pound in value.

Flexibility is key. The company can accommodate one off specialist projects bringing together CAD Design, manufacture, assembly, installation and commissioning on site. Specific expertise includes the design and incorporation of hydraulic, electrical and control systems.

- ***Design consultancy and development***
- ***Fabrication***
- ***Assembly***
- ***Installation and commissioning***

Capabilities

Hot and Cold Metal Forming

straightening
auto cold sawing
plate folders
guillotines
rolling
shearing
punching
open die and upset forging
heat treatment

Machining

CNC up to 6m length
precision grinding

Protection

shot peening
painting and anti corrosion
(ecoat KTL and epoxy powder lines)

Support services

- test & research laboratory
- 10,000 m² tool and machine workshop
- access platforms – up to 25m
- 20 tonne installed crane capacity (with 13.5m ceiling height)

Sectors

- power generation
- nuclear
- oil and gas
- renewable energy
- waste recycling
- civil and structural engineering
- mechanical handling
- bridges and cranes
- defence
- rail

Scope of work

- design, CAD and drawing service
- project management
- light, medium and heavy fabrication
- assembly and refurbishment
- site installation and commission
- stainless steel fabrication
- MiG and TiG welding
- machine move and site erection
- subcontract labour

Testimonials

Our vast and varied experience includes work with various large contractors, these include:

OUTOKUMPU

Maintenance contracts and site installation projects.

"We have worked with Tinsley Bridge Services on various maintenance contracts and site installation projects and I would highly recommend their competent and experienced team."

Paul Lister Project Engineering Manager, OUTOKUMPU

ALSTOM

Power generation plant and equipment.

"Tinsley Bridge Services have established a solid reputation for providing an excellent work force and broad technical ability. Our work together has always been to a high standard and efficient timescale."

Mick Lawson Maintenance Manager, ALSTOM

SARCLAD

Recent jobs have included the fabrication of surface texture stations and filtration units for various specifications.

"We have used Tinsley Bridge Services as a key supplier for machining, fabrication and assembly projects including the hydraulic, electrical control, installation and commissioning of a range of specialist equipment and machine tools."

"I would highly recommend their team, who possess excellent technical knowledge across a broad range of manufacturing capabilities and provides a competitive but flexible world class quality and delivery service."

Mark Johnson Production Manager, SARCLAD

Working with us

Few other British fabrication companies have the depth of financial and technical support that Tinsley Bridge Services enjoys through its holding company and its network of subsidiaries.

Member of

Advanced Manufacturing Research Centre

Quality

All work is conducted under the strictest health and safety requirements, specifications and quality assured standards:

- ISO 9001
- TS 16949
- ISO 14001

Pursuing accreditation for BS 18001 health and safety (management) system.
