

Tinsley Bridge Limited

Supply Chain Management

Vision Statement:

“To use the full extended “Supply Chain” to continually improve customer service, reduce leadtimes, increase flexibility and minimise costs.”

Strategy:

To use the full resources of TBL and its extended supply chain to:-

- Aim for 100% delivery performance as measured by the customer
 - o Available steel stock to mitigate between the steel suppliers response and that required by customers.
 - o Maintain spare capacity to ensure TBL production can respond within its express leadtimes rather than its planned leadtimes.
 - o Hold strategic stock of all parts but particular note of low volume parts.
- Develop all key suppliers using the MMOG/LE model to maximise the resilience and performance of the supply base.
- Review the IT support systems to ensure the technology is being used in the most cost effective and supportive manner.
 - o ERP system and other systems supported by data down loaded from ERP system.
- Work towards increasing stock turn each year as a measure of financial efficiency.
