

Tinsley Bridge Limited

Quality Policy

- TBL is an independent business that specialises predominantly in the design and manufacture of automotive products and the manufacture and supply of components & systems for railway track and signaling applications.
- Our goal is to provide both quality products and quality services with punctuality to our customers.
- It is the policy of the company to measure, analyse, improve and manage our business processes and to realise continual improvements.
- We continually drive the performance of the business through team working, elimination of waste and reduction of process variability.
- TBL Management Committee originates annual Quality objectives and reviews these regularly throughout the year.
- TBL recognises and understands the significance that many of our products are safety critical components.
- Our business management systems are continuously developed to meet customer, stake holder and applicable statutory and regulatory requirement
