## Tinsley Bridge Group

### Environmental Policy

---

- Environmental responsibility is for all employees but management is directly responsible for the operation, maintenance and audit of the Environmental Management System.
- The Environmental Management System is documented, implemented and maintained.
- Tinsley Bridge Group within its training, imparts knowledge, ensures understanding, encourages application, fosters guided attitudes and motivates its employees to conduct their activities in an environmentally responsible manner.
- Mindful of environmental impacts, Tinsley Bridge Group produces products by minimising energy consumption, use of natural resources and waste minimisation.
- Tinsley Bridge Group management monitors, interprets, reviews and resets environmental objectives and targets within its sphere of activities.
- Tinsley Bridge Group is committed to fulfil its compliance obligations, such as complying with environmental legislation, complying with relevant regulations accordingly applicable and complying with any customer specific environmental requirements.
- Tinsley Bridge Group is committed to the philosophy of pollution prevention but simultaneously being prepared for environmental emergencies that have trans-boundary impacts.
- Tinsley Bridge Group is committed to continuous improvement programmes and practices for conducting operations in an environmentally sound manner utilising technology wherever practicable.
- Information communication is made to employees, customers and other interested parties.
- Tinsley Bridge Group encourages its suppliers and contractors to apply similar principles with regard to environment management.
- Tinsley Bridge Group strives to balance supporting environmental protection and pollution prevention with socio-economic needs.
