

Tinsley Bridge Group

Environmental Policy

Tinsley Bridge Group is committed to managing our operations in a way that is sustainable and environmentally sound and recognise the impact that our business activities can have on the environment.

We seek to conserve natural resources and help to protect the environment and prevent pollution, by reducing our carbon footprint and waste. We apply our Tinsley Bridge Group philosophy, tools and techniques to continuously improve operational efficiency and environmental performance.

Environmental responsibility is for all employees across the group, management is directly responsible for the operation, maintenance and auditing of the Environmental Management System.

Our environmental objectives have been set and regularly reviewed to ensure that our improvement programmes and actions effectively implement our environmental policy:

- Minimise our impact on the environment through zero reportable environmental incidents, through pollution prevention whilst being prepared for environmental emergencies that have transboundary impacts.
- Manage and reduce our carbon footprint through energy reduction, improving efficiency and minimising waste.
- Carry out continual improvement programmes and practices for conducting operations in an environmentally sound manner utilising technology wherever practicable.
- Use BS EN ISO 14001 Environmental Management Systems to ensure standard process are in place to manage the environment.
- Ensure employees are aware of the environmental issues relevant to their activities and have a level of knowledge and understanding appropriate to their environmental responsibilities. This is achieved through training, imparting knowledge, increasing understanding, guiding attitudes and motivating employees to conduct their activities in an environmentally responsible manner.
- Introduce suitable arrangements to allow communication to all persons who work for, or on behalf of the organisation and it's interested parties.
- Commit to fulfilling compliance obligations, environmental legislation and relevant regulations accordingly in addition to any specific customer environmental requirements.
- Conduct an annual review of our objectives, targets and KPI's and where necessary update this policy.
- Encourage environmental protection amongst our clients, suppliers and subcontractors.
