

Tinsley Bridge Limited

Quality Policy

- TBL is committed to work with suppliers and customers to establish and maintain the highest quality standards.
- We continually review the effectiveness of our processes through our independently approved quality management system that meets the requirements of ISO 9001 and IATF 16949 and by the setting and monitoring of quality objectives and KPI targets. These processes ensure that the quality management system achieves its intended results.
- It is the policy of the company to measure, analyse, improve and manage our processes and to promote continual improvements.
- We promote the use of the process approach and risk-based thinking
- We continually drive the performance of the business through team working, elimination of waste and reduction of process variability.
- We will always endeavour to meet the requirement of our customers.
- We appreciate that many of our products are safety critical components and have the processes and capability to fulfill the requirements.
- We will review and revise this policy as necessary at periods not exceeding 12 months.
- This policy is distributed to all employees through our website and management systems. All employees are expected to contribute to the implementation of this policy. Senior management support the engagement by all employees.
